

29 courses on:

Intro to Data and Data Science
Microsoft Excel
Probability and Statistics
Mathematics
Tableau
Power BI
SQL
SQL Integrations
Python Programming
Git and GitHub
R Programming
Machine Learning in Python
Deep Learning with TensorFlow
Data Visualization with Python, R, Tableau
and Excel
Data Preprocessing with NumPy
Intro to Business Analytics

Including industry specific advanced
specialization courses

CERTIFICATE No: AA-403CC10E79

CERTIFICATE OF COMPLETION

Eva González

has successfully completed the 365 Data Science Program

365 Data Science

365 Data Science Program is a comprehensive 28 course online program covering Fundamentals of Data Science (introduction to data science, Excel, mathematics, statistics, probability, Power BI and Tableau), Programming Tools; (SQL, Python, Git & GitHub and R programming) and Advanced topics (Machine and Deep learning, SQL + Tableau + Python). To be awarded certification, students must complete 18 required courses plus at least 1 specialty elective. Upon completion of the 365 Data Science Online Program, the designee is considered to be qualified for work as a Data Scientist.
